

Your entire sales presentation and a blood pressure test... now in the same time.

Answering the need for your message to be communicated accurately and quickly is what makes the Digital Associate the perfect sales tool. It's control central for any type of audio visual sales presentation. What makes it so revolutionary and unique is that it's the ONLY equipment you'll require to run your message—Turn it on and it does the work for you. It's so easy to use you can leave it behind with your customer and pick it up later. The Digital Associate is a simple solid state device with no moving parts who's brain is a 32-bit processor, meaning that it's free of all problems

associated with other computer-based solutions. It can be programmed in a number of ways: to run manually (great for one-on-one situations), interactively, and automatically in a loop. It can also be utilized as a training tool by guiding the user through information via on-screen choices. It plugs into any projector, outside speaker, TV, monitor or plasma display device. Because it's programmed before you present, it cuts down the margin for error to zero. We're quite proud of the Digital Associate; because we can truthfully say:

Press Here For Everything.
